Freshness assessed at the forecast cutoff

FORECAST CUTOFF 19 Oct 2026 / 20:22 UTC

01 THE SCORED CARD

MATCHUP	MODEL FAVORITE	WIN CHANCE
Alexander Volkanovski vs. Movsar Evloev	Movsar Evloev	68.2%
Petr Yan vs. Merab Dvalishvili	Merab Dvalishvili	57.2%
Alexander Volkov vs. Rizvan Kuniev	Alexander Volkov	68.8%
Aaron Pico vs. Losene Keita	Losene Keita	58.8%
Azamat Murzakanov vs. Dominick Reyes	Dominick Reyes	60.2%
Grant Dawson vs. Nurullo Aliev	Grant Dawson	51.7%

A 60% forecast still assigns the other fighter a 40% chance. Win probability is a model estimate, not a confidence score or a guarantee. The following pages show the factors and available inputs.

Matchup intelligence

Probability and evidence are separate. Factors describe the fitted model's direction; they do not prove causation.

01 FEATHERWEIGHT / 5 ROUNDS

MODERATE LEAN

Alexander Volkanovski

31.8% WIN PROBABILITY

Movsar Evloev

68.2% WIN PROBABILITY

DIRECTIONAL FACTORS

- Takedowns landed per 15 minutes favors Movsar Evloev.
- Age comparison favors Movsar Evloev.
- The model's age-above-32 term favors Movsar Evloev.

INPUT COVERAGE

Alexander Volkanovski: 18 prior UFC fights / 9 earlier fights with strike counts / 5 earlier archive fights with detailed statistics / 76.0 minutes in the selected statistics window / age available to model / reach 181.6 cm available to model (dated profile) / earlier-fight stats available to model

Movsar Evloev: 10 prior UFC fights / 8 earlier fights with strike counts / 5 earlier archive fights with detailed statistics / 85.0 minutes in the selected statistics window / age available to model / reach 184.2 cm available to model (dated profile) / earlier-fight stats available to model

Market comparison unavailable: no verified two-sided price fresh at this forecast cutoff.

OBSERVED ATHLETE STATISTICS

Alexander Volkanovski		Movsar Evloev
181.6 *	Reach (cm)	**184.2 ***
5.99	Sig. strikes landed (/ min)	**3.91**
3.31	Sig. strikes absorbed (/ min)	**2.80**
57	Striking accuracy (%)	**48**
59	Striking defense (%)	**61**
1.63	Takedowns (/ 15 min)	**4.78**
69	Takedown defense (%)	**61**
0.20	Submission attempts (/ 15 min)	**0.19**
0.30	Knockdowns (/ 15 min)	**0.00**

* Marked values were used in this forecast. Unmarked current career averages are descriptive; they are separate from the model's earlier-fight adjusted statistics.

02 BANTAMWEIGHT / 5 ROUNDS

SMALL LEAN

Petr Yan

42.8% WIN PROBABILITY

Merab Dvalishvili

57.2% WIN PROBABILITY

DIRECTIONAL FACTORS

- Takedowns landed per 15 minutes favors Merab Dvalishvili.
- Significant strike defense favors Petr Yan.
- Significant strike accuracy favors Petr Yan.

INPUT COVERAGE

Petr Yan: 16 prior UFC fights / 15 earlier fights with strike counts / 5 earlier archive fights with detailed statistics / 105.0 minutes in the selected statistics window / age available to model / reach 170.2 cm available to model (dated profile) / earlier-fight stats available to model

Merab Dvalishvili: 17 prior UFC fights / 15 earlier fights with strike counts / 5 earlier archive fights with detailed statistics / 114.7 minutes in the selected statistics window / age available to model / reach 172.7 cm available to model (dated profile) / earlier-fight stats available to model

Market comparison unavailable: no verified two-sided price fresh at this forecast cutoff.

OBSERVED ATHLETE STATISTICS

Petr Yan		Merab Dvalishvili
170.2 *	Reach (cm)	**172.7 ***
5.16	Sig. strikes landed (/ min)	**4.42**
4.24	Sig. strikes absorbed (/ min)	**2.80**

03 HEAVYWEIGHT / 3 ROUNDS

MODERATE LEAN

Alexander Volkov

68.8% WIN PROBABILITY

Rizvan Kuniev

31.2% WIN PROBABILITY

DIRECTIONAL FACTORS

- Elo result history favors Alexander Volkov.
- Reach comparison favors Alexander Volkov.
- Age comparison favors Rizvan Kuniev.

INPUT COVERAGE

Alexander Volkov: 19 prior UFC fights / 15 earlier fights with strike counts / 5 earlier archive fights with detailed statistics / 56.9 minutes in the selected statistics window / age available to model / reach 203.2 cm available to model (dated profile) / earlier-fight stats available to model

Rizvan Kuniev: 3 prior UFC fights / 3 earlier fights with strike counts / 2 earlier archive fights with detailed statistics / 30.0 minutes in the selected statistics window / age available to model / reach 193.0 cm available to model (dated profile) / earlier-fight stats available to model

Market comparison unavailable: no verified two-sided price fresh at this forecast cutoff.

OBSERVED ATHLETE STATISTICS

Alexander Volkov		Rizvan Kuniev
203.2 *	Reach (cm)	**193.0 ***
4.84	Sig. strikes landed (/ min)	**4.32**
2.90	Sig. strikes absorbed (/ min)	**2.22**

04 FEATHERWEIGHT / 3 ROUNDS

SMALL LEAN

Aaron Pico

41.2% WIN PROBABILITY

Losene Keita

58.8% WIN PROBABILITY

DIRECTIONAL FACTORS

- Significant strike defense favors Losene Keita.
- Takedowns landed per 15 minutes favors Aaron Pico.
- Time since the previous fight favors Losene Keita.

INPUT COVERAGE

Aaron Pico: 2 prior UFC fights / 1 earlier fight with strike counts / 1 earlier archive fight with detailed statistics / 3.4 minutes in the selected statistics window / age available to model / reach 179.1 cm available to model (dated profile) / earlier-fight stats available to model

Losene Keita: 2 prior UFC fights / 2 earlier fights with strike counts / 2 earlier archive fights with detailed statistics / 17.9 minutes in the selected statistics window / age available to model / reach 181.6 cm available to model (dated profile) / earlier-fight stats available to model

Market comparison unavailable: no verified two-sided price fresh at this forecast cutoff.

OBSERVED ATHLETE STATISTICS

Aaron Pico		Losene Keita
179.1 *	Reach (cm)	**181.6 ***
6.16	Sig. strikes landed (/ min)	**3.91**
3.11	Sig. strikes absorbed (/ min)	**3.97**
54	Striking accuracy (%)	**47**
45	Striking defense (%)	**65**
6.54	Takedowns (/ 15 min)	**0.00**
Unavailable	Takedown defense (%)	**100**
0.00	Submission attempts (/ 15 min)	**0.00**
0.00	Knockdowns (/ 15 min)	**1.68**

Nurullo Aliev / Official UFC athlete profile — 19 Oct 2026 / 19:48 UTC

The complete coverage picture

A source-listed matchup can lack a publishable model forecast when stable research identities are unresolved.

6 SCORED **8 NOT SCORED**

No probability is assigned to the matchups below. Missing predictions are not even-money picks and do not imply either fighter is less capable.

02 UNSCORED MATCHUPS

01 Lone'er Kavanagh vs. Ramazan Temirov

NOT SCORED

Stable research identity not established for Ramazan Temirov. Name-only or provisional history was not merged.

02 Nikita Krylov vs. Abdul Rakhman Yakhyaev

NOT SCORED

Stable research identity not established for Abdul Rakhman Yakhyaev. Name-only or provisional history was not merged.

03 Abus Magomedov vs. Cam Rowston

NOT SCORED

Stable research identity not established for Cam Rowston. Name-only or provisional history was not merged.

04 Colby Thicknesse vs. Asaf Chopurov

NOT SCORED

Stable research identity not established for Colby Thicknesse and Asaf Chopurov. Name-only or provisional history was not merged.

05 Abubakar Vagaev vs. Jacob Malkoun

NOT SCORED

Stable research identity not established for Abubakar Vagaev. Name-only or provisional history was not merged.

06 Bolaji Oki vs. Daniel Santos

NOT SCORED

Stable research identity not established for Bolaji Oki. Name-only or provisional history was not merged.

07 Kody Steele vs. Noah Gugnon

NOT SCORED

Stable research identity not established for Kody Steele and Noah Gugnon. Name-only or provisional history was not merged.

08 Iasmin Lucindo vs. Nicolle Caliari

NOT SCORED

Stable research identity not established for Nicolle Caliari. Name-only or provisional history was not merged.

What supports the forecast

Saved evaluation, the model's limits, and the public source trail.

03 RETROSPECTIVE EVALUATION

1,447 BOUTS

2023-12-09 to 2026-09-19

61.30%	0.65217	0.23048
WINNER ACCURACY	CALIBRATED LOG LOSS	BRIER SCORE

V5 log loss: 0.66144. Current model: 0.65217. Absolute difference: -0.00927. Lower loss is better.

95% paired event-date bootstrap interval / log-loss difference: [-0.01715, -0.00136].

This measures conditional resampling variation in the retained benchmark. It does not account for dataset, identity, model-selection, or source-timing uncertainty.

Rolling origin	5,278 bouts / 61.63% accuracy / 0.65360 loss
2026 / weaker current year	398 bouts / 57.29% accuracy / 0.67830 loss

The fixed benchmark was reported previously and is not a fresh holdout. The 2016-2026 rolling summary includes the 2016-2023 development years used to select settings. Bootstrap intervals exclude data and selection uncertainty. The feature candidate was selected on development years before this fixed evaluation. A loss interval crossing zero does not establish a reliable gain. In 2026, probability log loss worsens from 0.67366 to 0.67830; the pooled gain does not establish improvement in the latest year.

READING THE MODEL

The model estimates the bout winner from earlier UFC results, Elo history, experience, recent form, rest, and available birth dates. An age-above-32 term allows an additional age-related effect. Saved coverage identifies which additional reach or earlier-fight statistics were available to this fitted model. Observed current career averages are shown separately and do not become historical training evidence. Missing optional inputs contribute neutrally. Coverage describes available evidence, not a fighter's ability. Model factors are associations in log-odds units, not causal explanations.

FORECAST LIMITS

- These are forecasts for an unstarted event using retrospectively assembled research history; they do not establish operating readiness or a wagering edge.
- 8 matchups are not scored because stable research identities are unresolved. Provisional identities were not silently merged.
- Reach and earlier-fight statistics enter this model. Archive reach is treated as an approximate static adult attribute in historical replay; historical measurement dates are unknown. Current career averages are descriptive only. Injuries, camps, non-UFC records and later results are not modeled.
- Probabilities describe model estimates, not certainty. A 60% favorite can lose four times in ten even under perfect calibration. Results vary by year; the latest yearly benchmark covers a partial year.
- The card can change before fight night. This frozen edition does not update automatically.

Public sources & provenance

Public links identify the retained source observations; they do not establish operating approval.

CARD, CAPTURE & INPUT NOTES

- Official card captured 2026-10-19T19:38:12Z. 6 of 14 listed matchups scored.
- Research result history ends 2026-09-19; later event results are not included in result-history features.
- Earliest card start: 2026-10-24T14:00:00Z; main card: 2026-10-24T18:00:00Z.
- Current card and identity links were checked by software; human roster and identity review remains pending.
- No bookmaker API was queried. Quoted odds on public event pages were excluded because they have no verified bookmaker capture/update times.
- Current official UFC profile rates are shown for context and never replace earlier-fight model inputs. Official numeric reach is interpreted as inches and converted by 2.54. Dated official reach supplies these forecasts.
- Takedown accuracy is omitted because official profile panels contain inconsistent or incomplete counts for several fighters. Other published current rates are displayed as source-reported context.
- The all-card statistics store supplies strictly earlier fight records, including striking, takedowns, control, knockdowns and submission attempts. Same-date records are excluded, with a two-day timing embargo before the target date. Optional missing history is disclosed in each matchup.
- Selected rich metrics use the last five available fights, keeping whole-date ties. The original V5 history features still use all earlier eligible history. Selected rich fight counts and minutes are shown separately from that original history.
